

**PERSONAL MENTION.**

TUESDAY.  
M. J. Thompson of St. Paul; Thomas Early of Dallas, Texas and M. J. Parrot of St. Louis, Mo.

WEDNESDAY.

Mrs. Oda Hollard of Marcella, O. F. is spending several days with C. S. Timmons and his wife. Mrs. Hollard is well known here and many happy social gatherings have been promised in welcoming her to Amarillo.

After spending several weeks with his brother, C. C. Timmons, B. B. Timmons, a wealthy rancher of western Texas, returned home this morning. During his stay here Mr. Timmons has invested quite a little money in real estate throughout the city.

Lewis Cunningham, the cab driver who was seriously injured in a runaway several weeks ago is out and will soon be able to return to work.

Cunningham's horse took fright at a passing automobile and ran nearly half a mile on Polk street ending their dash by upsetting the hack and throwing Cunningham to the ground. His shoulder was given a bad wrench and he received numerous cuts and bruises about the head. One long gash across the throat threatened to prove fatal but under the care of physicians he has recovered.

THURSDAY.

S. J. Blod and wife leave tonight for the Fort Worth & Denver for Marion, La., where they are called by the serious illness of a sister of Mrs. Blod. Before returning Mr. Blod will try the curative qualities of the waters at Hot Springs, Va., in hopes they will benefit his rheumatism, with which he has been troubled for some time.

**Doctor Says It Will Vaccinate You Against Consumption.**

"The idea of vaccination against consumption is not a new idea," said a physician. "And, furthermore, you and I have unconsciously many times perhaps vaccinated ourselves against this disease."

"I have vaccinated myself against consumption? I must have done it in my sleep, then."

"Not at all. Let me explain."

"Chautaukian, Binghamton, Griggs, Debning, Calumet, Goshen and other eminent investigators have taught us that the germs of consumption—the bacilli of little living creatures that eat up the lungs—do not enter our lungs through the respiratory tract, but through the intestines—that is to say we don't breathe in consumption germs, we eat them."

"In the region of the intestines, therefore, these men for some years conducted their vaccinations for consumption. They took calves and they vaccinated these calves with milk containing dead bacilli. Accordingly, they say the calves' milk containing the bacilli, and because the latter cannot digest the milk, it impairs its digestive powers, among those that had been vaccinated no evil effect whatever ensued."

"Among animals and perhaps among men milk containing dead consumption germs induces a virus which, applied to the intestines, is a sure cure for consumption."

"Therefore, when you and I drink our milk boiled (as we should always do despite the oyster taste) we are, if the milk happens to contain bacilli, actually introducing into our intestines the virus that, among animals at least, cures consumption."

"Moral—Drink boiled milk only."

A Certain Cure for Croup—Used for Ten Years without a Failure.

Mr. W. C. Bott, a Star City, Ill., hardware merchant is enthusiastic in his praise of Chamberlain's Cough Remedy. His children have all been subject to croup and he has used this remedy for the past ten years, and though they much feared the croup, his wife and he always felt safe upon retiring when a bottle of Chamberlain's Cough Remedy was in the house. His oldest child was subject to severe attacks of croup, but this remedy never failed to effect a speedy cure. He has recommended it to friends and neighbors and all who have used it say that it is unequalled for croup and whooping cough. For sale by Golding Drug Co.
